Tano, Swabi

Education

Undergraduate Student at
UET Peshawr, (2021 -)

- CGPA: 3.83
- Relevant Coursework:
Physical Education,
Computer System
Engineering

Skills

- C/C++
- Python
- JavaScript
- ML/DL
- Team Leadership
- Project Management

About me

As an undergraduate at UET Peshawar, I've evolved from a frontend developer to a Python enthusiast delving into the intricacies of Deep Learning. Completing Andrew Ng's Machine Learning Specialization laid the foundation, and my ongoing Deep Learning Specialization reflects my commitment to pushing the boundaries of AI. Eager to bring this passion to a dynamic Deep Learning internship.

Certifications

- **Machine Learning Specialization**
 - Coursera, [15,May,2023]
- **Deep Learning Specialization (In Progress)**
 - Coursera, [30,fab,2023]

Projects

Movie Recommender System

- Developed a personalized movie recommender system using collaborative filtering or content-based filtering techniques.

Face Mask Detection using CNN

- Implemented a Convolutional Neural Network (CNN) for real-time face mask detection.
- Trained the model on a dataset containing images of people with and without masks.
