HAMMAD AHMAD

AI Enthusiast

As an undergraduate student, I am deeply passionate about machine learning, deep learning, natural language processing, and large language models (LLMs). My true excitement lies in generative AI, especially fine-tuning existing models on custom datasets to create novel and impactful solutions

SKILLS

- LLM Fine-Tuning(Gpt-3.5,Llama2,Stable Diffusion)
- NLP (sentiment, NER)
- Computer Vision (YOLOv8)
- DL (neural networks, CNNs, LSTMs)
- ML (regression, decision trees, XGBoost)
- Python

RELEVANT EXPERIENCE

Creative Text Generation with LLMs
Independent Research | Feb 2024 - Present

- Explored large language models (LLMs) such as GPT-3, Llama-2 and BERT for creative text generation.
- Fine-tuned pre-trained models on custom datasets to generate contextually relevant content.

Chatbot Developer
Independent Research | Jan 2024 - Feb 2024

- Designed and developed a conversational chatbot using natural language processing techniques.
- Conducted independent research to enhance the chatbot's capabilities, including context-aware responses and user engagement.

EDUCATION BACKGROUND

Undergraduate Student
University of Engineering and Technology Peshawar | Aug 2021 - Present
